Tribin BA

Alkaline circulation cleaner with active chlorine

Properties

- dissolves grease, protein and other organic soiling
- foam-free
- especially for cleaning blood systems
- with water hardness stabilizers

Application

Tribin BA is an alkaline, chlorine-containing CIP and circulation cleaner for special use as a cleaning agent for blood-carrying systems in slaughterhouses. Tribin BA reliably cleans all areas of blood systems such as sticks, hoses and pipes, collection and shuttle containers as well as tanks made of alkali-resistant materials. Due to the oxidative cleaning power, fresh and denatured blood residues are safely removed from the system. With an optimally adjusted cleaning system, low and therefore high-quality germ levels are achieved in the collected blood in the long term.

Dosing

CIP/recirculation cleaning	
Concentration	1,0 - 2,0 %
Temperature	40 - 65 °C
Exposure time	gemäß Maschinentakt
Addition	After cleaning with Tribin BA, rinse with drinking water quality.

Technical data

Density (20°C)	pH-value	Conductance (1%; 20°C)
1,20 kg / l	12 - 13 ; 1 %	8,4; 1 % mS/cm

Titration

Prepare 10 ml application solution and destroy the chlorine by adding a spatula tip of sodium thiosulphate. Titrate with 0.1 N hydrochloric acid against the indicator phenolphthalein.

Consumption (ml) x 0.27 = concentration in %

Notes

Storage:
Store the product only in the original container and in a frost-free place between +5 and +20°C. Avoid direct sunlight. Please reseal the container tightly after removing partial quantities.

This product is halal certified.
The certification was carried out with reference to the standards "BPJPH Decree No. 20 2023" and "OIC/SMIIC 50-1:2022" in product category K for the production, filling, storage and distribution of cleaning agents and disinfectants.
