

InkClean Extra

Water-free, highly alkaline special cleaner

Properties

- Low emission
- No dilution necessary, ready-to-use solution
- Also for manual application
- Also removes cross-linked paints and varnishes

Application

InkClean Extra is an anhydrous, highly alkaline cleaning concentrate for direct application. InkClean Extra is only applied undiluted to dry surfaces using suitable stainless steel brushes.

Instructions for use:

The exposure time depends on the type and strength of the soiling. Residues of InkClean Extra are removed with water after the exposure time. A final rinsing of the surface with water under high pressure and thorough drying are recommended. It is possible to discharge the treated rinsing water with parts of the cleaner in compliance with local regulations.

Suitable surfaces: Ceramics, steel, stainless steel

Not suitable surfaces: Aluminum, zinc and non-ferrous metals

Area of application: manual process, cleaning of printing and embossing rollers

For removing: cross-linked, hardened paints and varnishes (all ink systems)

Dosing

Manual Application

Concentration	100 %
Temperature	20 °C – 40 °C

Technical data

Density (20°C)	pH-value
1,08 kg / l	14 ; 100 %

Notes

Store the product in its original container.

Storage should be frost-proof, although the solidified products can be used again after thawing without any loss of quality.
