

# O 33 Aktiv 15

## Liquid disinfectant concentrate

### Properties

- based on peracetic acid
- Strong microbicidal effect
- Broad spectrum of action

### Application

O 33 Active 15 is a highly effective disinfectant concentrate based on 15% stabilized peracetic acid for cold and hot applications. Compared to products based on other active ingredients, it has a very broad spectrum of activity and a strong microbicidal s. This makes it possible to produce mixtures that are applied in a conductivity-controlled manner and clean and disinfect in a single work step.

Recommended concentration: Effectiveness (under low organic load at 20°C)  
Bactericide 5 min / 0.03

### Technical data

Density (20°C)	pH-value
1,15	2,9

### Titration

Pipette a sample of 10 ml into an Erlenmeyer flask and make up to approx. 100 ml with distilled water. Acidify with approx. 20 ml dilute sulphuric acid (10%) and then titrate with potassium permanganate solution (0.02 mol/L) until a weak pink coloration occurs. The coloration must be stable for at least 30 s.

$$V \text{ (volume of potassium permanganate solution in ml)} \times 0.07 = \% \text{ O33 Active 15}$$

### Biocide

Use biocide products with care. Always read the label and product information before use.

Notified according to national legislation for biocides under No. N-19863, N-16051.  
100 g product contains 14.9 g peracetic acid

Maximum usability from manufacture: 12 months in the closed original container.

### Notes

Store the product only in the original container and frost-free.  
Direct sunlight should be avoided.  
After removing partial quantities, the container should be resealed.
