

Petrosol SAN

Powerful sanitary cleaner

Properties

- very powerful
- pleasantly fragrant
- RK-listed
- can be used on acid-resistant surfaces

Application

Petrosol SAN is a highly concentrated sanitary cleaner based on phosphoric acid. Dirt typically found in sanitary areas, such as limescale and rust, is easily removed by Petrosol SAN. The addition of perfume oil creates a pleasant fragrance in the cleaned rooms during and after cleaning. Petrosol SAN is registered in the list of approved cleaning agents for ceramic coverings in swimming pools (RK list). Petrosol SAN is suitable for the main and maintenance cleaning of acid-compatible surfaces such as ceramic, glass, porcelain, anodized, chrome and stainless steel. Petrosol SAN should not be used on marble, enamel, polyamide and other acid-sensitive materials. If in doubt, check material compatibility beforehand! Thoroughly pre-wet the surfaces with water before cleaning.

For extreme contaminations, use a more concentrated solution. For use in the HD device. Pre-dilute 1 : 5. Avoid misting. Rinse with water after a suitable exposure time.

Dosing

Maintenance cleaning

Concentration 25 bis 50 ml / 10 l cold water

Basic cleaning

Concentration 300 bis 500 ml / 10 l cold water

Technical data

Density (20°C)	pH-value
1,14 kg / l	2,0 ; 1 %
