

Spezial SN

Strongly acidic foam cleaner

Properties

- Removes stubborn mineral deposits
- contains a mixture of strong mineral acids
- foam stabilized

Application

Special SN is a pH-acidic foam cleaner based on a mineral acid mixture for use in the food and beverage industry. It has been developed for cleaning acid-resistant surfaces such as stainless steel appliances, containers, tanks, aggregates and racks. Special Application recommendation:

1. Coarse dirt removal
2. Pre-rinse with water
3. Lather the surface to be cleaned with subsequent contact time. Caution! Special SN must not be allowed to dry on stainless steel surfaces! If necessary, repeat the foam. We recommend a temperature range of 20 -60 °C when using Special SN.

Please note that protein denaturation occurs above 50 °C, which may result in additional cleaning work.

Dosing

Foam cleaning

Addition

Protein denaturation is to be expected above 50 °C.

Technical data

Density (20°C)	pH-value
1,13	1,5 - 2 ; 1 %

Titration

Prepare 10 ml application solution and titrate with 0.1 N sodium hydroxide solution against the indicator phenolphthalein.

Consumption (ml) x 0.23 = concentration in %

Notes

Store the product only in the original container and frost-free.
Direct sunlight should be avoided.
After removing partial quantities, the container should be resealed.
