

SECASENE Bright

Cleaning boosters

Properties

- specially adapted to the properties of SENSENE™
- excellent antistatic effect
- low-foam formulation; can also be used for small distillations
- significantly improved soil removal through optimized surfactant mixture

Application

1-bath process

Centrifuge portion for distillation (approx. 25% liquor exchange) = 2 - 3 ml SECASENE™ Bright / kg of material

2-bath process

Liquor regeneration by distillation of the entire 1st bath (50% liquor exchange) = 8 - 10 ml SECASENE™ Bright/ kg of material into the 2nd bath

Dosing

Master record

Concentration	1 - 2 ml / l Solvent
Addition	in the working tank and filter

Additive

Concentration	0,8 - 1,0 % of fabric weight
---------------	------------------------------

Technical data

Density (20°C)	pH-value
0,97 kg / l	7

Notes

Store the product only in its original container and in a frost-free location.

The product is not sensitive to frost, but it will become viscous if stored for long periods at temperatures below 0°C. However, after warming up, it can be used again without any loss of quality.
