

# EW Intensive

## Slightly alkaline defoamer

### Properties

- highly effective
- suitable for cleaning processes with intensive mechanics
- can be used in both cold and hot temperatures

### Application

EW Intensive is a slightly alkaline active ingredient concentrate with strong anti-foaming properties. EW Intensive can be used for hot and cold solutions. EW Intensive can be used as a foam inhibitor in alkaline and acidic media. EW Intensive is particularly suitable for foam control in brewing baths, crate washers and other highly turbulent systems in the food industry. EW Intensive can be added both manually and via automatic dosing systems.

After treatment with EW Intensive, rinse with fresh water when used in food processing plants to remove all product residues from the cleaned surface.

### Dosing

#### Defoaming

Concentration	50 - 100 ml / m <sup>3</sup> cleaning solution
Temperature	10 - 80 °C
Exposure time	gemäß Maschinentakt

### Technical data

Density (20°C)	pH-value
1,02 kg / l	9

### Notes

#### Storage:

Store the product only in the original container and in a frost-free place between +5 and +40°C. Avoid direct sunlight. After removing partial quantities, please reseal the container tightly.
