

BÜFA-Clean Citro

Mildly acidic vehicle cleaner concentrate

Properties

- based on organic acids
- Extremely gentle cleaning
- Removes limescale residues
- for brush washing systems and manual applications

Application

BÜFA-Clean Citro is a cleaning concentrate for the acidic exterior cleaning of rail and commercial vehicles. It can also be used as a mild descaler to remove water stains and limescale residues. The special combination of surfactants with organic acid results in extremely gentle cleaning of the surfaces and vehicles to be treated.

BÜFA-Clean Citro can be mixed with water in any ratio. The application concentration of the cleaner depends on the washing process, the degree of soiling and the type of soiling of the surfaces and vehicles to be cleaned. For manual cleaning, the solution is applied with a sponge or washing brush and rinsed off thoroughly after 5 - 10 minutes with clear water - if possible at high pressure - to remove all detergent residues and dissolved dirt. Appropriate preliminary tests are recommended for use in car washes, as a pre-spray cleaner and for descaling. The system manufacturer's instructions on dosage must be observed. Heated surfaces must not be treated. When using for the first time, carry out a test application on a concealed area to check the compatibility of the material.

Manual cleaning: 1:1 to 1:10 diluted with water
Pre-spraying method: 1:4 to 1:10 diluted with water
Brush washing system: depending on the system
Limescale removal: 1 : 5 to concentrate, repeat if necessary

Technical data

Density (20°C)	pH-value
1,05 kg / l	2,0 - 3,0

Notes

Only store the product in the original container and in a frost-free place.
Direct sunlight should be avoided.
After removing partial quantities, the container should be resealed.
The surfactants contained in the product meet the conditions regarding biodegradability as specified in Regulation EC 648/2004 for detergents.
The product does not contain any organic complexing agents that are not sufficiently biodegradable, e.g. EDTA (according to Annex 49 of the Waste Water Ordinance).
Due to the formulation components used, no organically bound halogen compounds (AOX) are contained as active substances.
