

Lival Soft

Regreasing agents and softeners

Properties

- Especially for leather, furs, wool and silk
- loosens the pile and ensures a soft, supple feel
- Results in good core lubrication
- is extremely gentle on colours, freshens up colours and increases shine

SENSENE[®]

Application

In perchloroethylene and hydrocarbon solvents:

For the re-greasing of suede leather, 30 - 50 ml of Lival Soft per liter of solvent is used in perchloroethylene, and 15 - 30 ml of Lival Soft per liter of solvent is used in hydrocarbon solvents. For smooth leather and furs, 20 ml perchloroethylene and 10 ml/l of solvent are used in hydrocarbon. For leather parts that are not re-dyed, a fluorocarbon resin impregnation with, for example, Secasit Lotus, can also be carried out subsequently in the cleaning machine using the spray method. As a re-fattening agent for textiles, 0.5% Lival Soft - based on the fabric weight - can be added to the last cleaning bath.

Technical data

Density (20°C)
0,81 kg / l

Notes

Store the product only in its original container, cool and frost-free.
After partial quantities have been removed, the container should be closed again.
