

Oldomat Natural GSM

Ecological dishwasher detergent

Properties

- chlorine-free
- Chlorine and phosphate-free
- for all water hardnesses

Listings

EU-Ecolabel listed

Application

Oldomat Natural GSM is a liquid, non-foaming cleaning concentrate for commercial use in commercial kitchens and other food processing companies. Excellent cleaning results are achieved even with very hard water. Dishes made of porcelain, plastic, stainless steel and glass are cleaned gently and residue-free when dosed correctly. Due to the high content of water hardness-binding substances, Oldomat Natural GSM can also be used very well in machines that work without water softening systems; the calcification of appliances and heating elements is effectively prevented. Due to the absence of active chlorine-containing compounds in the product, Oldomat Natural GSM does not contribute to the formation of AOX in waste water.

Oldomat Natural GSM is used in commercial dishwashers in industrial kitchens and for cleaning crates, containers and parts in continuous flow systems in food processing companies. Oldomat Natural GSM is used in commercial dishwashers in commercial kitchens and for cleaning crates, containers and parts in continuous flow systems in food processing plants.

Dosing

Dishwashers

Concentration	1 to 4 g / l water
Temperature	according to machine cycle
Exposure time	according to machine cycle
Addition	Oldomat Natural GSM is suitable in the usual application concentrations for use in dishwashers and for cleaning items made of stainless steel, plastics, porcelain, glass and aluminum.

Continuous flow systems for food processing

Concentration	0.5 to 1.0 %
Temperature	according to machine cycle
Exposure time	according to machine cycle
Addition	Oldomat Natural GSM is suitable in the usual application concentrations for use in continuous flow systems and for cleaning items made of stainless steel, plastics, porcelain, glass and aluminum.

Technical data

Density (20°C)	pH-value
1,24 kg / l	12,5 ; 1 %

Titration

Prepare 10 ml application solution, fill up with approx. 100 ml distilled water. Titrate with 0.1 N hydrochloric acid against the indicator phenolphthalein.

Consumption (ml) x 0.27 = concentration in %

Notes

Store the product only in the original container and frost-free.

Direct sunlight should be avoided.

After removing partial quantities, the container should be resealed.
