

EW Extra

Highly effective defoamer

Properties

- silicone-free
- highly effective for heavy protein loads in the cleaning liquor
- low temperature dependence

Application

EW Extra is a silicone-free, highly concentrated defoaming concentrate for foam reduction and prevention in aqueous media. EW Extra is effective at temperatures as low as 20° C, so that even troublesome foam can be effectively reduced in relatively cold applications. Even the development of foam in cleaning liquors with a high protein content is effectively prevented. EW Extra can be used as a highly effective defoamer in companies throughout the food and beverage industry. EW Extra is added to the media to be defoamed. It is added manually or via a dosing system. We recommend automatic dosing to achieve uniform foam attenuation. The first addition should be made at the start of cleaning to prevent foam from forming in the first place.

EW Extra can also be added to cleaning concentrates. It must be tested in advance whether it can be clearly dissolved in the intended quantity.

Dosing

Defoaming

Concentration	50 - 100 ml / m ³ cleaning solution
Temperature	> 20 °C
Exposure time	gemäß Maschinentakt

Technical data

Density (20°C)	pH-value
1,06 kg / l	9,25

Notes

Storage:

Store the product only in the original container and in a frost-free place between +5 and +40°C. Avoid direct sunlight. After removing partial quantities, please reseal the container tightly.

This product is halal certified.

The certification was carried out with reference to the standards "BPJPH Decree No. 20 2023" and "OIC/SMIIC 50-1:2022" in product category K for the production, filling, storage and distribution of cleaning agents and disinfectants.
