

Tropical

Fragrance

Properties

- pleasant, fresh scent with good adhesion to all types of fibers
- masks and neutralizes unpleasant odors
- gives a pleasant scent to the cleaning operation

SENSENE™

Application

Tropical fragrance is added to the cleaning liquor or - if multiple baths are used - to the last bath before drying.

Application quantity

Approx. 0.5 ml of Tropical fragrance per liter of solvent

The quantity should not exceed 3 ml per kg of dry cleaning items.

If unpleasant odours that adhere to the cleaned garment due to the cleaning liquor are masked with fragrance, this step should only be considered as an emergency solution. The cause of the unpleasant odor must be determined as quickly as possible so that a fault in the cleaning system can be rectified immediately.

The fragrance can generally be mixed with the cleaning boosters, finishing agents, liquid detergents and softeners. Compatibility should be checked in individual cases.

Technical data

Density (20°C)	pH-value
1,02 kg / l	7 - 8

Notes

Only store the product in the original container, tightly closed, dry and not too warm.
