

Lival LM

Brushing agents and cleaning boosters

Properties

- Especially for leather and furs
- highly concentrated oil preparation with a small amount of wetting, washing-active emulsifiers
- Renews the natural supple feel
- loosens velour

SENSENE[®]

Application

In perchloroethylene and hydrocarbon solvents

For pre-spotting (brushing on or spraying):

Lival LM is used pure or diluted 2:1 with water. Before cleaning, brushed leather articles must be air-dried. Since Lival LM has good water emulsifying properties, it is also possible to spray heavily soiled areas with water or steam before cleaning.

Machine application only:

8 - 10 min cleaning time in chloroethylene with 20 - 40 ml / l Lival LM

10 - 15 min cleaning time in hydrocarbon with 10 - 20 ml / l Lival LM

Approximately 3 batches can be treated with one bath. It is recommended to start with light-colored items. When working with the two-bath process, the second bath can be used as a pre-cleaning bath for the next batch.

Technical data

Density (20°C)	pH-value
0,83 kg / l	7,80 - 8,80

Notes

Store the product only in its original container, cool and frost-free.
After removing partial quantities, the container should be closed again.
