

# Tolo Polar

## Special cleaner for deep-freeze areas

### Properties

- removes oily and greasy soiling
- effective at low temperatures down to -30°C
- ready-to-use

### Application

Tolo Polar is a special cleaner for removing soiling in deep-freeze areas for food storage. Freezer rooms, counters, cabinets and freezer chests can be cleaned with Tolo Polar during operation. Removal of food and defrosting are not necessary, as the cleaning activity is clearly present even at freezer temperatures below -18°C. Tolo Polar can be used on all water and alcohol-resistant surfaces such as tiles, screed, concrete, various plastics, aluminum and stainless steel. Polycarbonate must not be cleaned with it.

#### Application recommendation:

Apply undiluted Tolo Polar to the surfaces to be cleaned by spraying or wiping. Leave on for up to 5 minutes and lightly scrub with a soft pad if necessary. Treat larger floor surfaces with a mop. Avoid drying during cleaning. Finally, dry the surface with a clean cloth or rubber lip.

If necessary, thoroughly wipe cold areas in counters, cupboards or chests with a nonwoven cloth soaked in Tolo Polar and then allow the surface to dry by evaporation.

### Technical data

Density (20°C)	pH-value
0,90 kg / l	5 ; 1 %

### Notes

#### Storage:

Store the product only in the original container and in a frost-free place.

Direct sunlight should be avoided.

After removing partial quantities, the container should be closed again.
