

# Paintex 839

Highly alkaline, water-miscible cleaner concentrate

# **Properties**

- Economical cleaner for demanding cleaning tasks
- Non-flammable in the application concentration
- Economical due to long service life of the wash bath and use in aqueous dilution
- low emission

## Application

Paintex 839 is a highly alkaline cleaning concentrate for the production of aqueous washing baths for use in immersion processes or in machine applications that tolerate foam. Paintex 839 is designed for the removal of light to medium cross-linked printing inks and lacquers Instructions for use:

Cleaned surfaces should be rinsed with water. Evaporation and carry-over can reduce the wash bath. Resharpen with the cleaner concentrate and water at the starting concentration.

Suitable surfaces: Steel, stainless steel, HDPE, PP, Teflon Not suitable surfaces: Aluminum, zinc, non-ferrous metals and (other) plastics Application area: Immersion process For the removal of: light to medium cross-linked printing inks and varnishes, all ink systems

# Dosing

Immersion process	
Concentration	30 % - 50 %
Temperature	20 °C - 80 °C

## **Technical data**

Density (20°C)	pH-value
1,09 kg / l	13,5

## Notes

Store the product in its original container. Storage should be frost-proof, although the solidified products can be used again after thawing without any loss of guality.
