Status: 11/17/2026

BÜFA Element N

Neutralizing agent

Properties

- improvement of water quality in the BÜFA Elements system
- balanced acid mixture for rapid pH reduction in the rinsing process
- for safe pH value reduction in textiles (core alkalinity)
- good compatibility of the mangle

Application

BÜFA Elements is a modular detergent system. Use the individual components of the modular system precisely according to your needs. Depending on your requirements, you can dose individual detergents and additives as needed for your process. This gives you the opportunity to achieve optimum washing results with as few chemicals as possible - applied precisely.

BÜFA Elements can be used for all types of laundry and stains. The high-quality and perfectly coordinated products are guaranteed to give you optimum washing results and preserve the value of your laundry.

Dosing

Use in the Elements process	
Concentration	1 - 3 %
Addition	depending on the washing process

Technical data

Density (20°C)	pH-value
1,11 kg / l	2,2 ; 1 %

Notes

Store the product only in its original container and protect it from frost.
After removing partial quantities, the container should be closed again.
