

# SolventClean 3D

## High-boiling solvent cleaner

### Properties

- Universal application
- safer: high flash point
- distillable

### Application

SolventClean 3D is a high-boiling solvent-based cleaner. It is suitable for direct use in machine or manual cleaning. Water-based and solvent-based ink systems are cleaned equally well by SolventClean 3D even at room temperature. For particularly thick layers with a high degree of cross-linking of the ink systems to be cleaned, manual spraying of the adhesions and an exposure time of approx. 20 minutes is recommended before machine cleaning.

Suitable surfaces: steel, stainless steel, aluminium, aluminium alloys, galvanized material, non-ferrous metals

Only treat after testing: Plastics

Area of application: manual and machine processes

For removing: water- and solvent-based paint systems

### Technical data

Density (20°C)
0,96 kg / l

### Notes

Store the product in its original container.

Storage should be frost-proof, although the solidified products can be used again after thawing without any loss of quality.
