

Paintex WT

Highly alkaline, water-based cleaner concentrate

Properties

- Suitable for adhesives and resins

Dosing

Concentration	30 % – 50 %
Temperature	45 °C – 80 °C

Technical data

Density (20°C)	pH-value
1,19 kg / l	12,5 ; 1 %

Cleaning bath

Flashpoint
> 95 °C (Pensky-Martens DIN EN 22719-A)

Titration

The concentration of the cleaning agent can be determined regularly by titration (with hydrochloric acid 1 M). The corresponding work instructions (available at cleaning@buefa.de) must be followed exactly. Titration can only be carried out with a pH electrode, as the wash bath is too dark in color (even when heavily diluted with distilled water).

pH value method:

Final pH value: 8.7

Titration factor: 4.93

Consumption of hydrochloric acid (ml) x 4.93 = concentration in %
