

# Orbin SEPT 10

## Liquid disinfectant concentrate

### Properties

- foaming
- can be used as an alkaline foam cleaner with a bleaching effect
- Very economical

### Application

Orbin SEPT 10 is a fast-acting, liquid disinfectant based on active chlorine. Due to the addition of foam-active surfactants, it is suitable for both foam and immersion bath disinfection. Orbin SEPT 10 is used for the disinfection of systems and equipment and for the disinfection of cleaned surfaces

3.0%/ 30 min/ 10 °C for bactericidal and levurocidal disinfection of cleaned surfaces  
4.2%/ 30 min/ 10 °C for bactericidal, levurocidal and fungicidal disinfection of cleaned surfaces

The application conditions refer to the disinfection of previously cleaned surfaces.

To avoid corrosion damage, the exposure time should not exceed 2 hours. Finally, rinse with water of drinking water quality. Orbin SEPT 10 should be applied

To avoid corrosion damage, the exposure time should not exceed 2 hours. Finally, rinse with water of drinking water quality. Orbin SEPT 10 should be applied

### Technical data

Density (20°C)	pH-value
1,10	11,5 - 12,5 ; 1 %

### Titration

Prepare 10 ml application solution and destroy the chlorine with a spatula tip of thiosulphate. Titrate with 0.1 N hydrochloric acid against the indicator phenolphthalein.

Consumption (ml) x 0.73 = concentration in %

### Biocide

Use biocide products with care. Always read the label and product information before use.

Notified according to national legislation for biocides under No. N-79304.  
100 g product contains 2.5 g active chlorine, released from sodium hypochlorite  
Maximum usability from manufacture: 3 months in the closed original container.

### Notes

Store the product only in the original container and frost-free.  
Direct sunlight should be avoided.  
After removing partial quantities, the container should be resealed.
