

Idekolin

Oil color remover

Properties

- Touch-up agent for paint, color, grease and wax stains
- not suitable for acetate, triacetate and natural silk
- water miscible

Application

Apply Idekolin to the previously moistened stain area and leave to work for a longer period in the case of stubborn stains. Idekolin is even more effective when mixed with water at a ratio of approx. 2:1. Then work thoroughly with a spotting brush or spatula, rinse with water and blow out with steam. Stains should be treated from the underside of the fabric on an absorbent surface. Take care when using on delicate fabrics. In case of doubt (especially if color fastness is suspected), carry out a hem test.

Technical data

Density (20°C)	pH-value
0,95 kg / l	7,5 - 8,5 ; 1 %

Notes

The product should only be stored in the original container and the container should be resealed after removing partial quantities.

The recommended storage temperature is +3 to +30°C.
