

Bano Spezial

Ready-to-use sanitary cleaner

Properties

- ready-to-use
- powerful
- based on fruit acid
- phosphate-free

Application

Bano Spezial is a gentle sanitary cleaner based on fruit acids. It develops a strong cleaning power on acid-resistant surfaces. It does not contain any aggressive mineral acids that could damage materials. By dispensing with phosphoric acid, it reduces the burden on waste water.

Bano Spezial dries stain-free and has a pleasant, deodorizing fragrance. It removes limescale and adhering dirt from ceramic, porcelain, stoneware, chrome, stainless steel and glass.

Bano Spezial is used for cleaning tiles, toilet bowls, urinals, washbasins, taps, mirrors, toilet and shower cubicles, for example.

Parts made of polyamide (e.g. toilet seats and lids, towel rails, door handles and fittings), marble and enamel must not be cleaned with Bano Spezial.

Application recommendation:

The product is sprayed directly onto the surface or applied with cleaning aids. Sufficiently pre-water tiled surfaces to prevent damage to the joint material.

Technical data

Density (20°C)	pH-value
1,01 kg / l	3,2 ; 1 %

Notes

Only store the product in the original container and in a frost-free place.

Direct sunlight should be avoided.

After removing partial quantities, the container should be resealed.

Surfactants

The surfactants contained in the product meet the conditions for biodegradability as laid down in Regulation EC 648/2004 for detergents.

Complexing agents

The product does not contain any organic complexing agents that are not sufficiently biodegradable, such as EDTA (according to Annex 49 of the Waste Water Ordinance).

AOX

Due to the formulation components used, no organically bound halogen compounds (AOX) are contained as active substances.
