

Detafix-Rostol

Rust remover

Properties

- easy to use in the pre-spotting in water
- applicable in post spotting
- mild formulation that is gentle on color and tissue
- suitable against rust and metal stains

Application

All products of the Detafix series are universally applicable in pre- and post-spotting. These are highly effective products, before their application on sensitive garments and on textiles with low color fastness, a hem test is required.

Detafix BIParts treated with the Detafix series products in the pre-spotting should be cleaned in the machine no later than 30 minutes after treatment.

Post-spotting

In the post-spotting, the Detafix series products are allowed to act on the stain and the Remark Detafix Rostol, as a strongly acidic reacting spotting agent, should always be rinsed out with water even in the pre-spotting and the treated area should be blown dry. An increased entry of Detafix Rostol into the solvent liquor can, as known fr
