

BÜFA-Clean Brilliant

Alkaline intensive cleaner with re-shine effect

Properties

- Highly effective intensive cleaner especially for large vehicles
- Removes even stubborn dirt gently
- Particularly high reflective effect

Application

BÜFA-Clean Brilliant can be used as an intensive cleaner with all common high pressure/HW devices and is suitable for use in automatic truck washes. It can be used on all types of commercial vehicles (trucks, cars, construction machinery, etc.) with a particularly high gloss-back effect. Other areas of application are general cleaning work in the workshop and wash bay, and as a pre-spray cleaner.

BÜFA-Clean Brilliant can be mixed with water in any ratio. The application concentration depends on the degree of soiling of the vehicles and surfaces to be cleaned. The application solution is sprayed on from bottom to top using a suitable HD/HW device or spraying device and rinsed off thoroughly with clear water - preferably at high pressure - after an appropriate exposure time. For use in truck wash systems, we recommend preliminary tests; the exact final mixture must be adjusted based on the cleaning results. The system manufacturer's instructions regarding dosage must be observed.

Do not treat hot surfaces with BÜFA-Clean Brilliant. The product must not be allowed to dry on sensitive and painted surfaces in particular. Sensitive paintwork may be attacked. When using the product for the first time, carry out a test application on a concealed area to check the compatibility of the material.

Pre-spraying method: 1:5 to 1:20 diluted with water

Washing systems: depending on the system

HD/HW devices: 0.1 - 1.0 % (at the nozzle)

Manual cleaning: 1:10 to 1:200 diluted with water

Technical data

Density (20°C)	pH-value
1,06 kg / l	11,0 - 12,0 ; 1 %

Notes

Only store the product in the original container and in a frost-free place.

Direct sunlight should be avoided.

After removing partial quantities, the container should be resealed.

The surfactants contained in the product meet the conditions regarding biodegradability as specified in Regulation EC 648/2004 for detergents.

The product does not contain any organic complexing agents that are not sufficiently biodegradable, e.g. EDTA (according to Annex 49 of the Waste Water Ordinance).

Due to the formulation components used, no organically bound halogen compounds (AOX) are contained as active substances.
