

Lizerna Intensive

High quality degreaser

Properties

- fat-dissolving special formulation for every wash
- Effective even at difficult stains at 30°C
- Versatile use as an emulsifier, wetting agent and detergency booster in all washing systems

Application

Lizerna Intensive is a highly efficient fat solvent which removes a wide range of stains, even at low temperatures. Since it is a very low-foaming product, it can also be used in washing machines and tunnel washers with high mechanical action.

The product can be added manually or via laundry-typical liquid dosing systems. It is suitable for use in both the pre-wash and, as an additive in the main wash, for extremely dirty items.

The recommended dosage depends on the application. When used as a grease solvent or detergency booster, the dosage table below should be observed.

Dosing	Degree of contamination		
	light	middle	heavy
Water hardness			
0 - 8.4	2		4
8.5 - 14			5

The application quantity refers to g / kg dry laundry.
You can find out the degree of hardness or water hardness in degrees of German hardness from your local water company.

Dosing

Wetting agent	
Concentration	0,2 - 1,5 g / kg dry laundry

Emulsifier for heavily pigment-contaminated laundry	
Concentration	6 - 15 g / kg dry laundry

Technical data

Density (20°C)	pH-value
1,00 kg / l	5,4 - 5,8

Notes

Store the product only in its original container and keep it frost-free.
The product should not be used above 70°C.
