Hypur Special

Odor Absorber

Properties

- with a powerful deodorizing effect
- eliminates strong odors
- universally applicable
- Can be used on all textiles

Application

Hypur Special is a concentrated odor absorber that can be used as a spray, a pre-treatment, or added to the washing machine—for example, to treat urine and sweat stains. For delicate colors and fabrics, a spot test should be performed first.

Use in the Washing Machine
A two-step washing process should be used. Add 5 ml/kg of dry laundry of Hypur Special during the pre-wash cycle. Better results can be achieved by adding it at the same time as detergent. From the main wash cycle onward, wash as usual.

Spray Application for Carpets
Hypur Special is sprayed undiluted as a fine mist onto areas with strong odors.
Allow to dry without further treatment.

Spray application for cleaning with water, PER, and KWL
Hypur Special is sprayed undiluted as a fine mist onto odor-affected wardrobe items. After allowing it to sit for about 10 minutes, wash or clean the pretreated textiles as usual.

Pre-treatment agent for cleaning in water and Per (not suitable for KWL)
Hypur Special is applied undiluted or mixed with a pre-treatment agent and brushed onto the soiled parts. After a maximum exposure time of 10 minutes, the pretreated textiles are washed and cleaned as usual.

=>For delicate items, the treated area should be blown dry on the surface before cleaning with perchloroethylene. To prevent graying, the cleaning solution should contain a sufficient concentration of cleaning enhancer.

Technical data

Density (20°C)	pH-value
1,00 kg / l	6 - 7

Notes

Only store the product in its original container and in a frost-free place.
The product is not sensitive to frost, but becomes viscous and can even solidify if stored below 0 °C for longer periods. After warming up, however, it can be used again without any loss of quality.
