

Lizerna Perox

Stabilized oxygen bleaching agent

Properties

- effective at low temperatures
- based on active oxygen
- ideal additive for pre- and sole detergents for stain removal
- can be used in all machines

Application

Lizerna Perox is an acidic bleaching agent based on active oxygen. It can be used in the main wash in combination with a sole detergent.

It can also be used as a neutralizing agent for the residues of chlorine bleach. After the chlorine bath, dose the product as follows in the next bath:

5 - 10ml/kg dry wash

Do not mix Lizerna Perox directly with products containing chlorine. This can cause toxic chlorine gas!

Dosing

Added as a bleach booster in the main wash

Concentration	5 - 10 ml / kg dry wash
---------------	-------------------------

Stain removal and intensive bleaching

Concentration	5 - 15 ml / l water
---------------	---------------------

Technical data

Density (20°C)	pH-value
1,12 kg / l	3,2

Notes

Protect from direct sunlight. Store in cool, dark rooms. Ideal storage temperature -5 °C to +30 °C.

Do not allow concentrated product to come into contact with organic or other concentrated cleaning and disinfecting agents.

For safety reasons, we recommend handling only in original containers.

Measures for environmental protection: Avoid entry into the environment. Do not allow undiluted product to enter drains.
