

Oldomat TBR Pulver

Immersion bath cleaner

Properties

- dissolves starch and protein
- universally applicable
- very good cleaning effect

Application

Oldomat TBR powder is a water-soluble, highly concentrated product with a high cleaning effect. Due to the selected ingredients, starch and protein residues are quickly and safely dissolved by the corresponding application solutions and can then be rinsed off very well.

Oldomat TBR powder is used in the kitchen as an immersion bath cleaner for dishes and cutlery and as a basic machine cleaner. In the food processing industry, Oldomat TBR powder can also be used as a problem solver, e.g. as a protein and grease remover in circulation/CIP systems. The application solutions can also be sprayed or applied manually. For manual surface cleaning, the application solution is applied to the surface to be cleaned using a brush or scrubbing brush. For both manual and machine cleaning, rinse thoroughly with water after a contact time of at least 10 minutes.

After treatment, when used in food processing plants, rinse with microbiologically safe water to remove all product residues from the treated surface.

Dosing

Cleaning with normal soiling

| | |
|---------------|--------------|
| Concentration | 0,5 - 1,0 % |
| Temperature | 50 - 60 °C |
| Exposure time | 30 - 60 min. |

Cleaning in case of heavy soiling

| | |
|---------------|--------------|
| Concentration | 1,0 - 2,0 % |
| Temperature | 50 - 60 °C |
| Exposure time | 30 - 60 min. |

Technical data

| pH-value | Bulk weight |
|-------------|------------------------------|
| 12,5 - 13,5 | ca. 1150 kg / m ³ |

Titration

Prepare 10 ml application solution, fill up with approx. 100 ml distilled water. Titrate with 0.1 N hydrochloric acid against the indicator phenolphthalein.

Consumption (ml) x 0.04 = concentration in %

Notes

Storage:

Store the product only in the original container and frost-free.

Direct sunlight should be avoided.

After removing partial quantities, the container should be resealed.
