

Quick Fresh

Universal floor and surface cleaner

Properties

- versatile in use
- spreads a pleasant fragrance
- easy to rinse off
- short drying times, with streak-free results

Application

Quick Fresh is a mild and gentle cleaner for universal use in the areas of building cleaning (offices, social and sales rooms, etc.) and interior cleaning of vehicles (streetcars, buses, trucks, cars, ...).

The formula delivers very good results, especially when used as a maintenance and floor cleaner in heavily frequented areas. Quick Fresh is free from aggressive ingredients. It can therefore be used on almost all water-resistant surfaces. If the color fastness of chair and seat covers is given, even upholstery cleaning using the spray extraction method is possible. Very short drying times of approx. one hour can be achieved.

Quick Fresh can be mixed with water in any ratio. The concentration depends on the type and degree of soiling of the surfaces to be cleaned. For manual cleaning, the application solution is applied using a cleaning cloth, sponge, brush or scrubbing brush and wiped off after approx. 5 minutes. Heavily soiled floors must be wiped with clear water after cleaning. For special applications and quick results, Quick Fresh is used in high concentrations up to undiluted. Drying before mopping should be avoided to prevent streaking.

Other application concentrations are

Spray extraction: 1:25 to 1:50 diluted with water

Special processes: undiluted to 1:1 diluted with water.

Dosing

Manual cleaning

Concentration	1:100 bis 1:200 in proportion with water
---------------	--

Floor cleaning

Concentration	1:50 bis 1:100 in proportion with water
---------------	---

Technical data

Density (20°C)	pH-value
0,97 kg / l	10,65

Notes

Only store the product in the original container and in a frost-free place.

Direct sunlight should be avoided.

After removing partial quantities, the container should be resealed.

The surfactants contained in the product meet the conditions regarding biodegradability as specified in Regulation EC 648/2004 for detergents.

The product does not contain any organic complexing agents that are not sufficiently biodegradable, e.g. EDTA (according to Annex 49 of the Waste Water Ordinance).

Due to the formulation components used, no organically bound halogen compounds (AOX) are contained as active substances.
