Lizerna Omega

Wash booster for native oils

Properties

- particularly powerful with native oils and fats
- particularly suitable for gastronomy, food industry and wellness in the hotel industry
- perfectly suited for white and colored textiles made of cotton, polyester and blended fabrics
- versatile use as an emulsifier, wetting agent and detergency booster in all washing systems

Application

Lizerna Omega is a highly efficient fat solvent which removes a wide range of stains, even at low temperatures. It was specially developed for the removal of native oils and fats. As it is a low-foam product, it can also be used in washing machines and tunnel washers with high mechanical action.

The product can be added manually or via typical laundry liquid dosing systems. It is suitable for both pre-washing and, for extreme soiling, as an additive in the main wash.

The recommended dosage depends on the application. When used as a grease solvent or to boost the washing power, follow the dosing table below.

Dosing	Degree of contamination		
Water hardness	light	middle	heavy
0 - 8.4	2	3	4
8.5 - 14	3	4	5
> 14	3	5	6

The application quantity refers to g / kg dry laundry.
You can find out the degree of hardness or water hardness in degrees of German hardness from your local water company.

Dosing

Wetting agent	
Concentration	0,5 - 1,5 ml / kg dry wash

Emulsifier for oil-contaminated laundry	
Concentration	6 - 8 ml / kg dry wash

Technical data

Density (20°C)	pH-value
1,00 kg / l	7

Notes

Store the product only in its original container and keep it frost-free.
The product is not sensitive to frost, but it will become viscous and may even solidify if stored for long periods at temperatures below 0 °C. However, it can be used again without any loss of quality after warming up.
