

SolventClean ACT

High-boiling solvent cleaner

Properties

- label-free
- Removes paints of all paint systems highly effectively, even
- Also suitable for removing pigment powders
- High-boiling: Flash point according to DIN EN 22719-A: ≥ 61 °C

Application

SolventClean ACT. is a high-boiling solvent-based cleaner. It is suitable for direct use in machine cleaning or manual cleaning. SolventClean ACT cleans water-based and solvent-based ink systems very effectively even at room temperature. The cleaner is also suitable for removing adhesives. For particularly thick layers with a high degree of cross-linking of the ink systems to be cleaned, manual spraying of the adhesions and an exposure time of approx. 20 minutes is recommended before machine cleaning.

Suitable surfaces: Steel, stainless steel, aluminium, aluminium alloys, galvanized material, non-ferrous metals

Only treat after testing: Plastics

Area of application: manual and mechanical process

For removal of: UV-, water- and solvent-based paint systems

Technical data

Density (20°C)
0,90 kg / l

Cleaning bath

Flashpoint
≥ 61 °C (Pensky-Martens DIN EN 22719-A)

Notes

Store the product in its original container.

Storage should be frost-proof, although the solidified products can be used again after thawing without any loss of quality.
